**Re: Proposed Environmental Investigative Sampling
Dayton Power & Light Company, 1900 Dryden Road,
Moraine, Ohio (DP&L Service Center)**

Dear Mr. Nash:

As we discussed on November 1, 2012, I am writing on behalf of my client, the Dayton Power & Light Company (DP&L) to request a conference call with representatives of U.S. EPA, including Leslie Patterson, to discuss Conestoga-Rovers & Associates' (CRA) Proposed Environmental Investigative Sampling notice, dated October 26, 2012. According to the notice, CRA proposed, and U.S. EPA approved, environmental investigation activities at the DP&L Service Center. We would like to discuss with U.S. EPA the purpose and goals of this investigation and whether CRA's proposed scope of work is adequately structured to produce the necessary information.

DP&L had been under the impression that U.S. EPA completed its investigation of the DP&L Service Center back in 2009 and 2010, as authorized under the Unilateral Administrative Order (UAO), dated August 25, 2009. While DP&L does not object to providing U.S. EPA access again to the DP&L Service Center, as provided for under the UAO, DP&L would like to bring closure to this issue in a timely manner and avoid future sampling events if at all possible since they do cause disruptions to DP&L's ongoing daily operations at the DP&L Service Center.

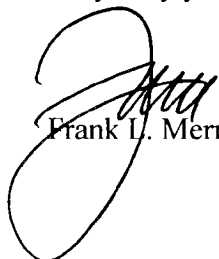

Moreover, DP&L would like to discuss coordination of the sampling activities and timing of same. CRA's letter, which is dated October 26, 2012, proposed to begin the environmental investigation in late October or November 2012. DP&L first received notice of this proposal in late October. Since it is now November, late October 2012 is not a possible commencement date.

Please contact me at your earliest convenience to discuss our request to convene a conference call with U.S. EPA on CRA's proposal. We are generally flexible in the next few weeks to convene a call on this matter.

Tom Nash
